How to use this guide

This guide is meant to support you. Think of it as a tool you can use anytime to:

- Have meaningful conversations with your care team
- Help organize your thoughts
- Clarify what matters most to you

It's important to get support from your loved ones. Empower them to ask questions too.

Always talk to your care team

They can help support you during treatment with RASONQUE

Side effects need real-time attention

If you think you're experiencing a side effect, call your care team right away. They can help you manage side effects.

Focusing on well-being can make a difference

Talk with your care team about how you are feeling physically and emotionally. They can connect you with palliative care specialists who will focus on improving your quality of life through pain management, nutrition, counseling, and more. Palliative care is not the same as hospice care. Palliative care specialists can work with you throughout your journey.

Make sure your voice is heard

Keep in touch with your care team. It will help them understand what matters most to you and your loved ones while taking RASONQUE.

Your care team is there to partner with you. This guide can help you feel prepared to talk with them. It can also support you during treatment.

What’s changed since your last visit?

Have you had any problems while taking RASONQUE?
If yes, please explain:

Did you miss any doses of RASONQUE in the past week?
If yes, how many:

What’s changed since your last visit?

Are you taking any new medications or medications that you haven’t told your doctor about yet?
If yes, list the name, the dose, and when you started:

Are you taking any vitamins, supplements, or herbal products?
If yes, list the name, the dose, and when you started:

Talking about side effects

Reporting side effects to your care team is important. Everyone on your care team has the same goal: to help you manage side effects and continue treatment. You can learn about the side effects sometimes seen with RASONQUE in the Side Effect Management Guide available on the Resources page at [RASONQUE.com](https://www.rasonque.com). Here are some guidelines to talk about side effects with your care team.

Be honest and specific

Your care team wants to know how you're feeling. Instead of saying "I don't feel well" or "It's probably nothing," try answering the following questions:

- Where are you feeling a side effect?
- When did the side effect start?
- How often does it happen?
- How severe is it on a scale of 1–10? (1=least severe)
- Is it getting better, worse, or staying the same?

Talking about side effects (cont)

Managing side effects is important.

Tell your care team about what you and your loved ones have tried. This includes:

- Being specific about side effects you’ve experienced
- Management strategies you’ve tried at home
- How long it has taken for any side effects to improve
- Any changes in daily treatment time
- If you’ve gone to the ER for care

Try to stay focused when you talk to your care team. Tell them about any treatment priorities you may have.

My priorities
Check the box to track any treatment priorities you and your loved ones have.

Managing side effects

Quality of life

Maintaining strength

Mental health, including emotional changes

Proper nutrition

Understanding what to monitor

Helpful reminders for your appointments

What to do **BEFORE** meeting with your care team

- Review this guide, write down any notes, and answer the questions inside
- Use the Treatment Journal available on [RASONQUE.com](https://www.rasonque.com) to record how you're feeling. Look over your latest entries
- Prepare 2-3 questions you want answered
- Bring a caregiver to support you. They can help take notes or speak up when needed

What to do **AFTER** meeting with your care team

- Review the treatment plan with your caregiver and write down next steps
- Schedule follow-up visits and/or any tests you may need
- Keep using this guide and the Treatment Journal to monitor how you're feeling
- Report any side effects to your care team right away
- Contact your care team with any questions or concerns about your health or your treatment
